CAREER OBJECTIVE

To use my existing and developing skills in a challenging Software Engineering position using my dedication, determination, and ability to grasp new concepts quickly and efficiently to improve my knowledge and skills, and add value to the organization.

SKILLS	Javascript (4 years)	PHP (2 years)	HTML (4 years)	SQL (5 years)	CSS (4 years)
	Coldfusion (1 year)	C# (3 years)	Java (1 year)	React (1 year)	Angular (1 year)

WORK EXPERIENCE

Texas Conference of Urban Counties, Austin, TX

November 2018 - Present

Software Developer

- Design, develop, and maintain both new and existing code, ranging from client-side development using Javascript, HTML, and CSS, to server-side code using C# and ASP.NET MVC, Web API, and .Net Core.
- Create, maintain, and run unit tests for both new and existing code, with a goal of delivering defect-free and well-tested code to QA.
- Create tables and data structures in MSSQL with Code-First approach using NHibernate.
- Enforce and maintain company coding patterns through peer reviews and pull requests in Github.
- Develop interactive and clear user interfaces using Kendo UI.
- Write seamless API integrations between different enterprise applications.

Glimpse Live/ABB Optical, Remote, Austin, TX

April 2017 - November 2018

Software Engineer

- Code new and current web applications created with JQuery, CSS, and HTML embedded with PHP.
- Participate in all phases of our software development life cycle to convert concepts and specifications into deployed applications and features.
- Develop Web API applications for data projects using C# and .NET.
- Document and perform quality assurance testing on all development.
- Create functions and stored procedures using T-SQL in SQL Server Management Studio.
- Enhance the company's internal and client facing web API's.
- Perform ongoing research and evaluation of new technologies and methodologies to improve the quality and feature set of the software.
- Develop internal components using React.js and .Net Web API.

CSX Technology, Jacksonville, FL

January 2016 - March 2017

Software Developer

- Coded, debugged, documented, and tested modifications to existing applications as well as new development.
- Devised solutions to expedite the procurement of required data for unique website architectures comprised of HTML, JavaScript, JQuery, CSS, ColdFusion, and AJAX.
- Conducted tests and assisted with analysis of applications to ensure software meets or exceeds requirements and standards, documenting problems, and regression testing to ensure resolution.
- Worked with testing team members to document test cases, expected test results, and test data requirements.
- Created Functions, stored procedures, packages and queries using PL/SQL
- Contribute as part of a research team in evaluating new technologies for the company such as React and Angular.

EDUCATION

Rutgers University School of Communication and Information, New Brunswick, NJ

B.A., Information Technology and Informatics
